# Our Unique Value Proposition

Fully Integrated and Full-Featured
Odoo apps are natively integrated to fully automate all your business processes for data centralization and real-time updates.

Scalable for Any Type of Business
Odoo has an app for every one of your needs — expand your Odoo system one app at a time as your business grows. This scalability makes Odoo suitable for SMEs with 1 user to MNCs with 300,000 users.
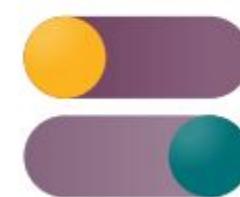

Highly Customizable and Intuitive Database
Beyond the standard features, Odoo can also be customized to meet specific needs to serve your company's unique workflow, however complex it may be; the intuitive design allows you to manage the system without extensive IT knowledge.

Odoo Apps

Sales
Takes care of any business with synergistic compatibility with Odoo Finance.

CRM
Organizes all your sales activities with centralized customer information, provides accurate forecasts, and generates real-time reports

Sales
Generates online quotations and invoices once an order is made in synchronization with your emails, Odoo Finance, and Website apps

POS
Sells your goods on a smart interface. Compatible with any device with integration with Odoo Inventory for real-time stock control

Subscription
Automates invoices for recurring sales and subscriptions with built-in analysis tools to enhance your sales performance in clicks

Rental
Gathers your rental process from scheduling to invoicing. Compatible with other product management apps to complete the lifecycle

Finance
AI-powered bookkeeping system integrated with the Sales Management and Inventory & Manufacturing modules.

Accounting
Manages your finance in clicks with bank synchronization, automated reconciliation, flexible fiscal localization, and customizable reporting

Documents
Saves time recording bills, scanning contracts, and approving documents to become a paperless company

Invoicing
Simplifies accounting by automatically billing sales & delivery orders, contracts, and timesheets; and produces customizable analysis reports with data from other integrated apps

Expenses
Keeps an eye on your budget, allows you to create, validate, or refuse expense submissions, and helps you manage expenditure per employee per team with a clear overview

Sign
Saves time recording bills, scanning contracts, and approving documents to become a paperless company

Inventory & Manufacturing
All-in-one software to streamline inventory, manufacturing, and warehouse processes, integrated with the Sales Management and Finance modules

Inventory
Improves your operations on Sales, Purchase, and Accounting with smart double-entry system, advanced automation, and real-time reporting

Manufacturing
Brings your production operations to the next level of efficiency with full traceability, work order management, production planning, and more

Purchase
Automates your workflow and keeps track of all agreements, quotations, and purchase orders for the best offer

Maintenance
Tracks, schedules, and triggers maintenance activity with automatically generated statistics, including MTBF and MTBR, for optimized performance

Quality
Defines quality control points and triggers quality alerts directly from workcenter panels on the Manufacturing app

PLM
Manages engineering changes and versions efficiently, with all updates communicated across teams in real time

Website
Create a unique experience and build stunning websites

Website Builder
Creates a stunning website for your businesses by drag-and-dropping the ready-made building blocks

eCommerce
Runs an online store for every type of business that also converts visitors into customers, fully integrated with Odoo Website Builder and Sales Management apps to manage your business

Blogs
Creates an attractive & mobile-friendly blog in no time with our easy-to-use drag & drop feature

Forum
Drives more traffic to your website, anticipates your customers' needs, and builds your own documentation library and community

Live Chat
Engages with visitors, delivers support, and answers questions in real-time

eLearning
Builds your own LMS that enables knowledge-sharing and community-based learning

Odoo Apps

Marketing
Integrated with Odoo CRM to amplify the impact of your business with the right marketing move

Social Marketing
Manages, plans, and monitors all your social media accounts, web push notifications, and live chat, all in one place

Email Marketing
Builds campaigns with ready-made templates and building blocks and produces real-time analytics with tracked links, ROI, and other advanced features

SMS Marketing
Instantly delivers campaigns into your contacts' pockets

Events
Covers all aspects of an Event Planner's job: from creation and ticket sales to visibility, organization, and promotion

Marketing Automation
Improves your sales performance with intelligent, data-driven, multifaceted automated campaigns to manage efficient end-to-end customer journeys

Survey
Automates employee reviews, satisfaction surveys, marketing campaigns, feedback forms, and many more to inform your business decisions

HR
The comprehensive HR suite to recruit, record expenses, and review employees' performance

Recruitment
Streamlines your hiring process by setting up a job board for easy tracking and overseeing the submitted applications

Time Off
Manages employee leaves in a calendar view updated in real-time with statistical reports generated in clicks

Appraisal
Helps you with employee evaluation with suggested performance appraisal timeline, automated reminders, and exportable answers

Referral
Gamifies the recruitment process and encourages your staff to refer a friend to the team

Fleet
Centralizes management of your vehicles, contracts, costs, insurance, and assignments with data automatically collected from integrated Sales Management and Finance apps

Services
The suite of apps that centralizes all your internal communication with integration with Odoo Sales Management and Finance apps

Project
Organizes, schedules, plans, and analyzes your external and internal projects to enhance employee collaboration

Timesheet
Tracks productivity to invoice timesheets to clients and predicts project performance and employees' availability with data collected from integrated apps

Field Service
Allows you to work anywhere on any device to deliver excellent service to your customers

Helpdesk
Provides an instant overview of your client tickets and timely customer service based on your custom SLA rules for optimized productivity

Planning
Oragnizes schedules in calendar views for better coordination, and grants your team access to take and unassign from shifts

Appointments
Manages meetings online and automates your scheduling process with customized appointment forms

Productivity
Serving all Odoo modules with enhanced team communication and efficiency

Discuss
Allows you to jump into discussions with your team from every Odoo app

Approvals
Manages your employees' requests on one centralized dashboard with customized approval rights

IoT
Connects and integrates all external devices with your Odoo database for increased productivity

VoIP
Explores more ways of getting in touch with your customers with all records saved on your database for your team's reference

Knowledge
Contributes to a collaborative library that can be viewed from any integrated Odoo apps

Customization
Personalizes your Odoo database

Studio
Tailors your database without coding: create apps, customize reports, automate workflows, and configure your system

Odoo's Open-Source Advantages

Customization

Odoo is highly customizable, allowing you to adapt the software to meet your specific business needs. You can modify existing modules, develop custom modules, and integrate with other systems.

Community Support

Benefit from a large and active community of users, developers, and partners who contribute to the platform's development and provide support.

Cost-Effectiveness

Being open-source, Odoo offers a cost-effective solution compared to proprietary software. You can reduce your upfront costs and ongoing maintenance expenses.

Scalability

Odoo is scalable, allowing you to grow your system as your business expands. You can add more users, modules, and features as your needs evolve.

Hosting Options

There are three hosting options for your Odoo Enterprise apps: Odoo SaaS for online hosting, Odoo.sh for dedicated cloud hosting, or On-Premise hosting for autonomy over your entire system.

Odoo SaaS (Software as a Service)

allows you to access your database from the cloud — simply connect to odoo.com with your credentials. Your database is 100% hacking-safe with no server maintenance and installation needed, as Odoo manages everything.

Odoo.sh

is a PaaS (Platform as a Service) option allowing you to customize your cloud-hosted database, fully integrated with Github and compatible with the 39k+ apps available on the Odoo app store or any custom modules. This out-of-the-box solution enables you to create your own developments while Odoo manages the infrastructure.

Odoo On-Premise

gives you full control of your database and the running of your software — customize it with third-party apps or create your own. We recommend this hosting option for customers with advanced technical knowledge, as it comes with full responsibility for running your infrastructure regarding its robustness, performance, and scalability.
