Our Objective

Streamline The Workflow

We develop semantic code and have taken the time to optimize every single bit and promise you that our dedicated team will secure your dream.

GRANDES MENTES

SATISFYING SERVICES

Our tailored approach combines cutting-edge innovation with personalized support, ensuring that every client's unique digital needs are not just met but exceeded. With a commitment to excellence, we drive growth and efficiency, turning IT challenges into opportunities for success..

BEING ON TIME & SCHEDULE

At the core of our IT project management is our commitment to timely delivery, ensuring that every solution is not only innovative but also implemented with precision and punctuality. We understand that in the fast-paced world of technology, time is a critical asset, and we are dedicated to meeting our clients' needs with swift, reliable service.

HIGH QUALITY, LOW COST

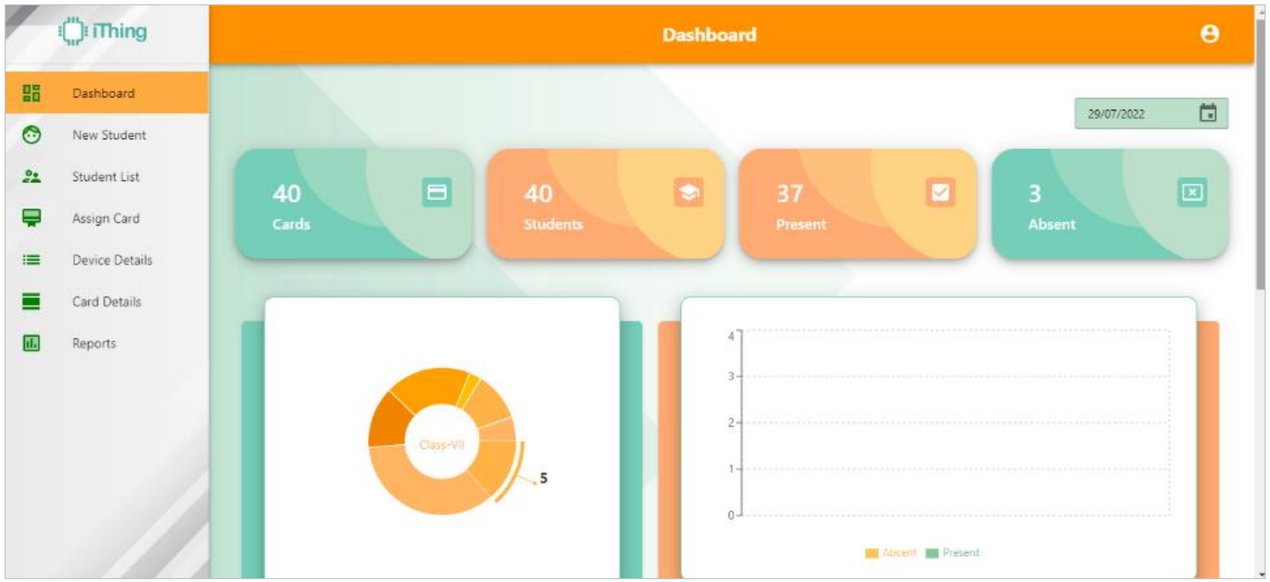
We develop quality and error free code. Our UI team ensure that project looks attractive and simple. We are leading with over 50+ technologies and with lower cost. We will provide best quality and feature.

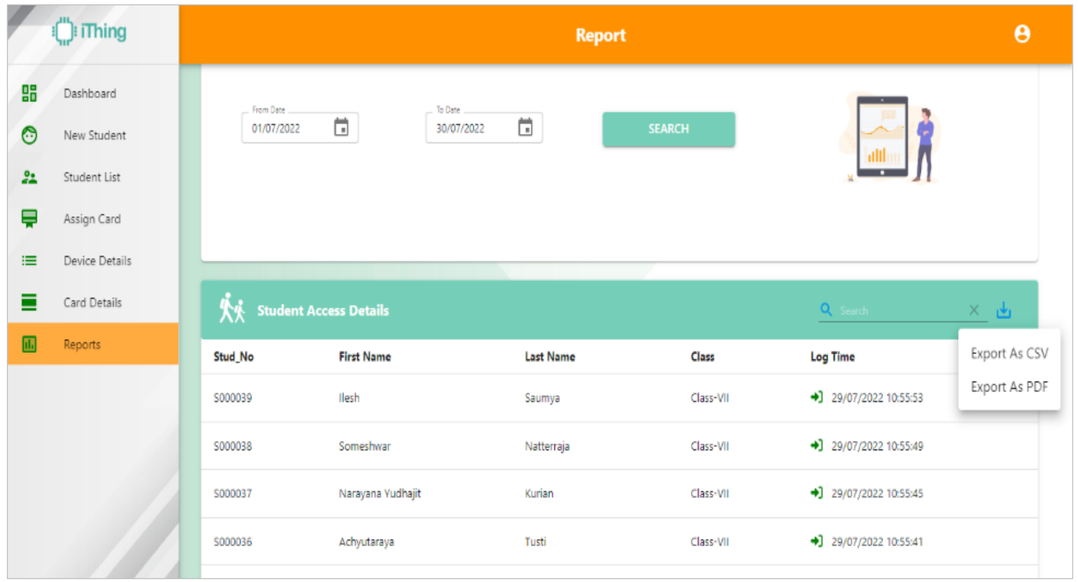
Our Recent Portfolio

School Campus Management system

Grandes Mentes Campus Automation & Management helps educational institutions go fully automated without any human intervention further. A fully automated process will capture all the data and movement of the students inside the campus.

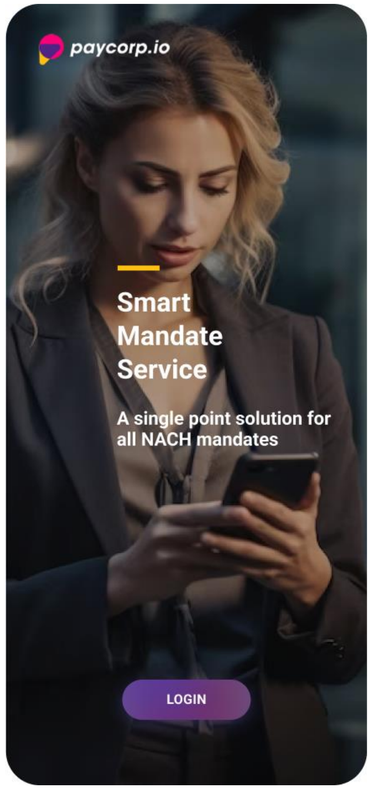
This application will help institutions in handling **Attendance Tracking, Time tracking, Movement Tracking, Library Automation, Cashless payment - Fee/Fine/ Canteen Purchase.**

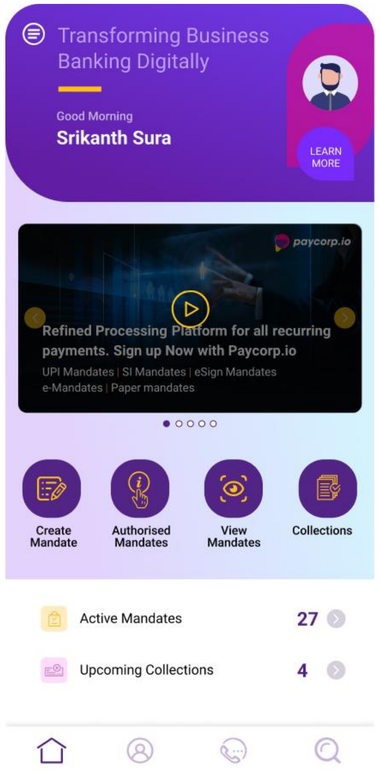


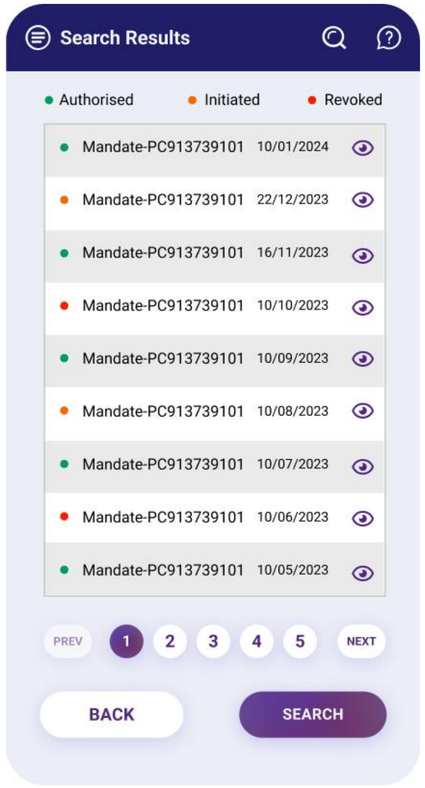


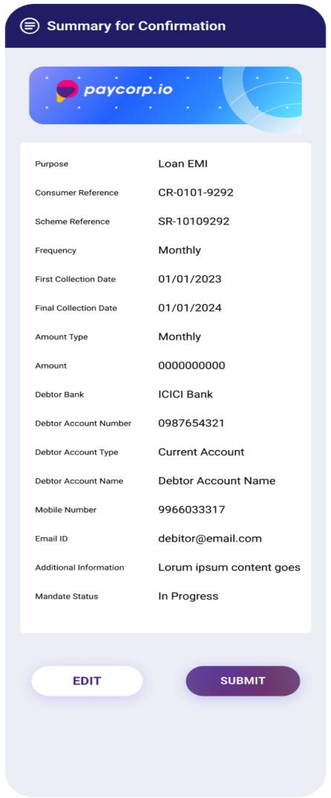
Paycorp.io mobile app

PayCorp is a FinTech/BFSI-Tech player, and their app automates collection of recurring payments. API mandates, eSign mandates, UPI mandates and paper mandates can be set-up conveniently



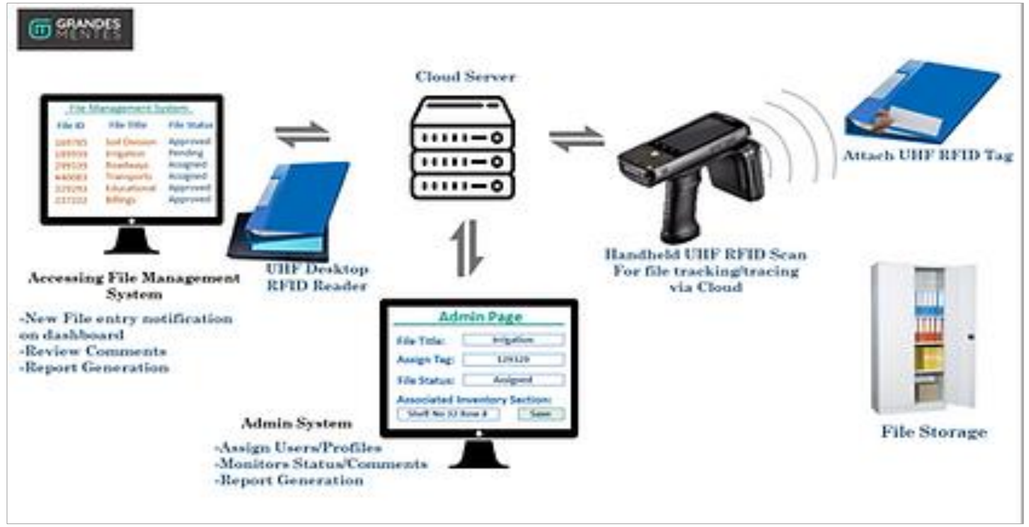


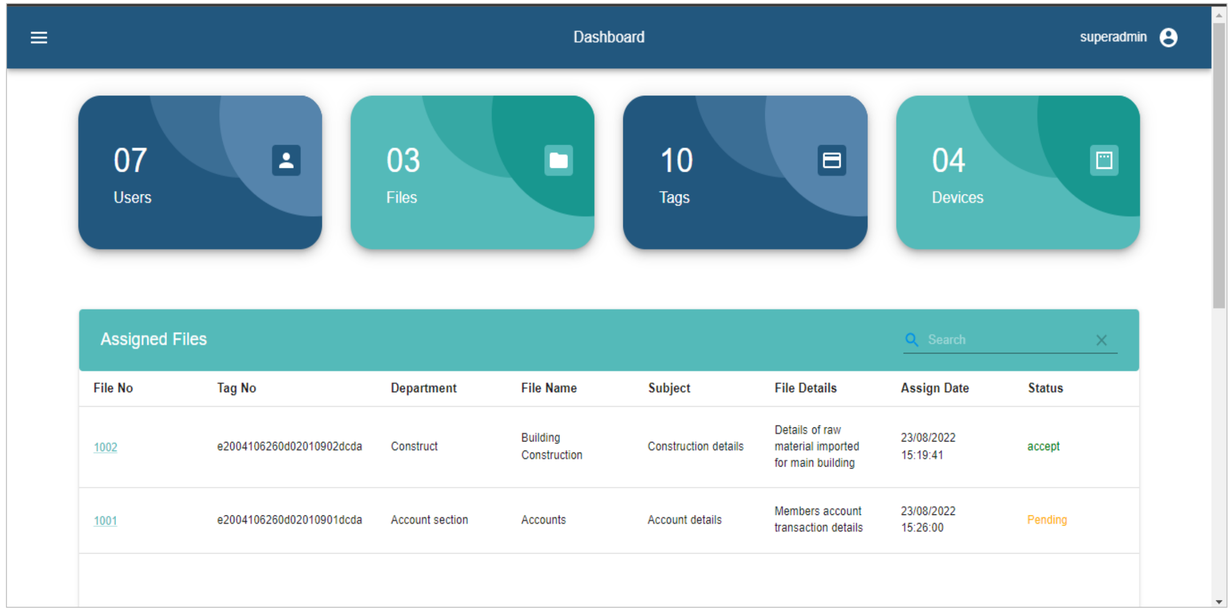


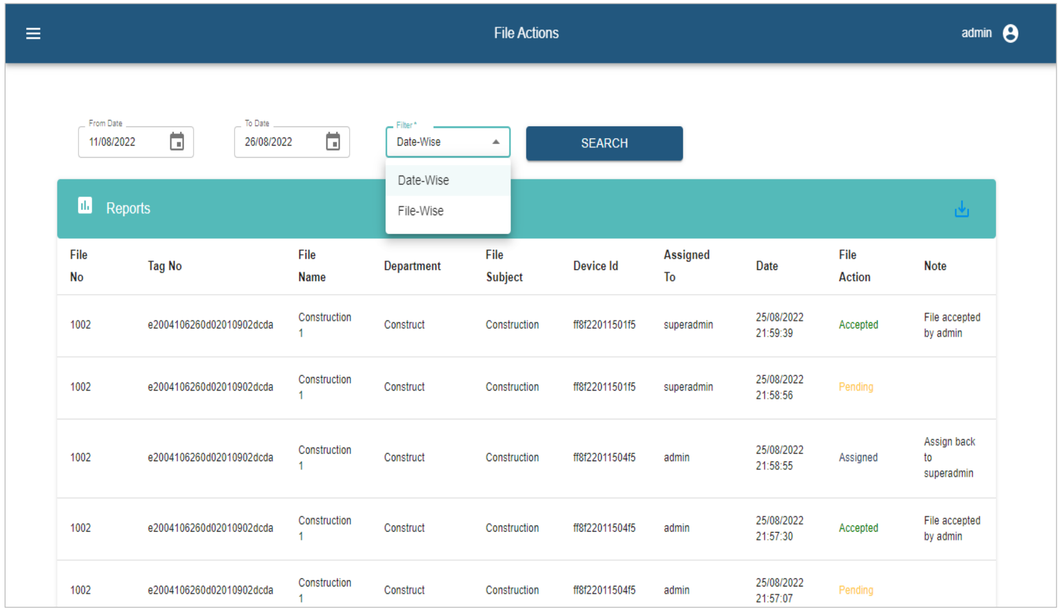


E-Governance File Tracking

RFID based File Tracking System is designed to reduce employee time spent maintaining and managing hundreds or thousands of files within a workplace.

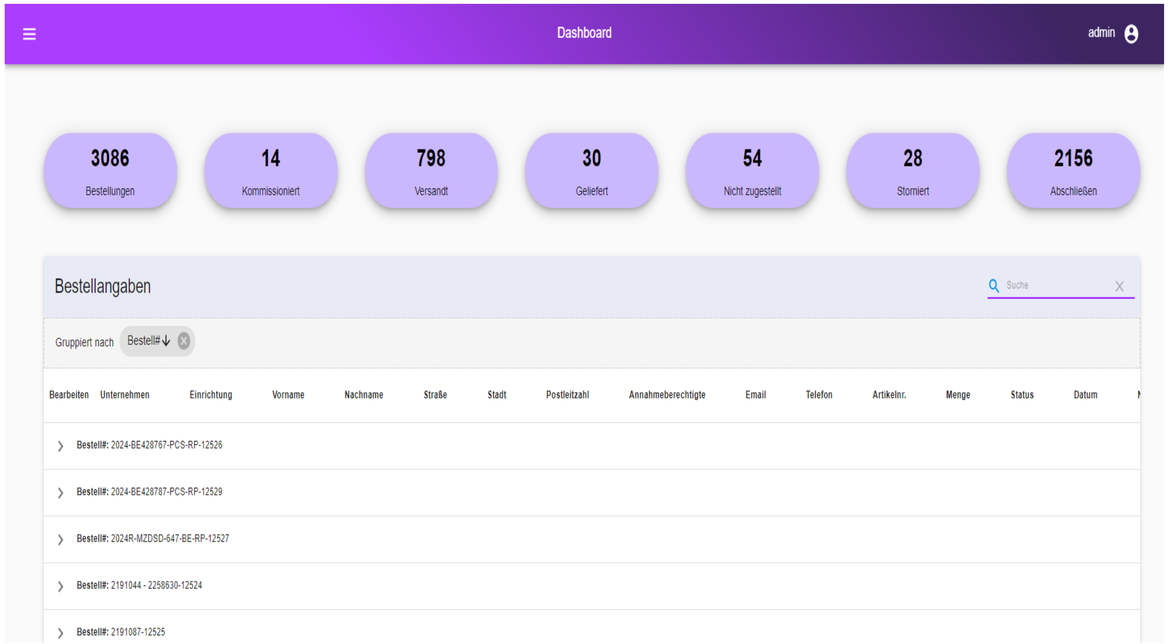


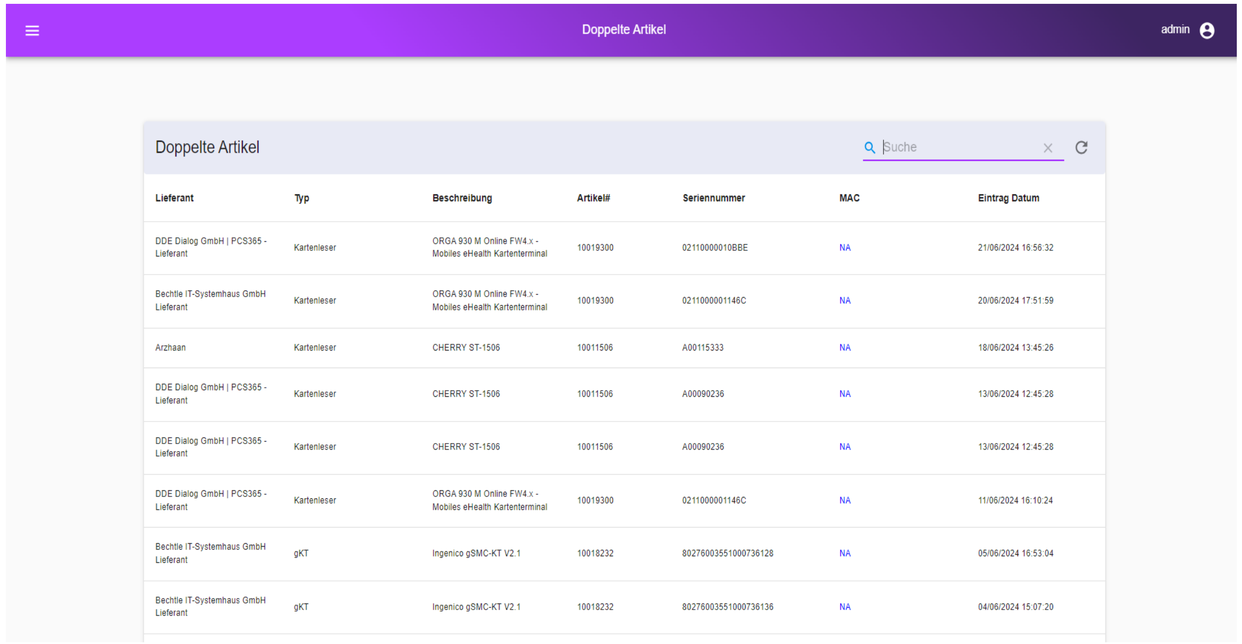




DDE - Logistics

The logistics platform is designed to optimize all operations, from placing an order to delivering it to a customer's door. Businesses use these systems to manage and automate activities in a digital environment. This also facilitates inventory management by tracking the stocks of each product.



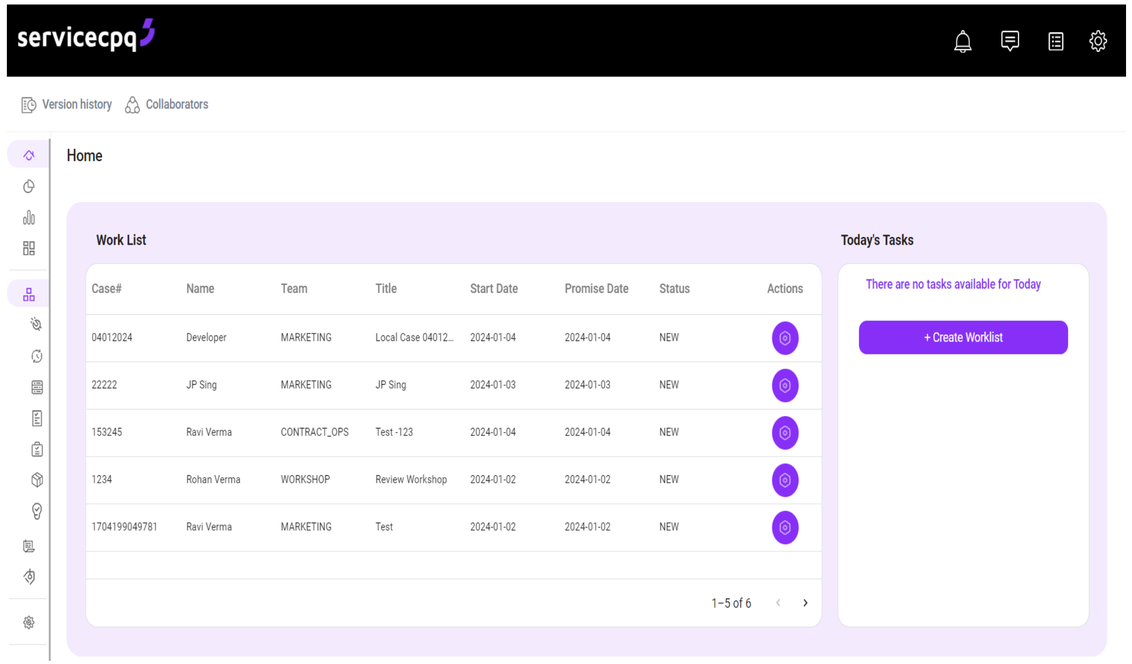


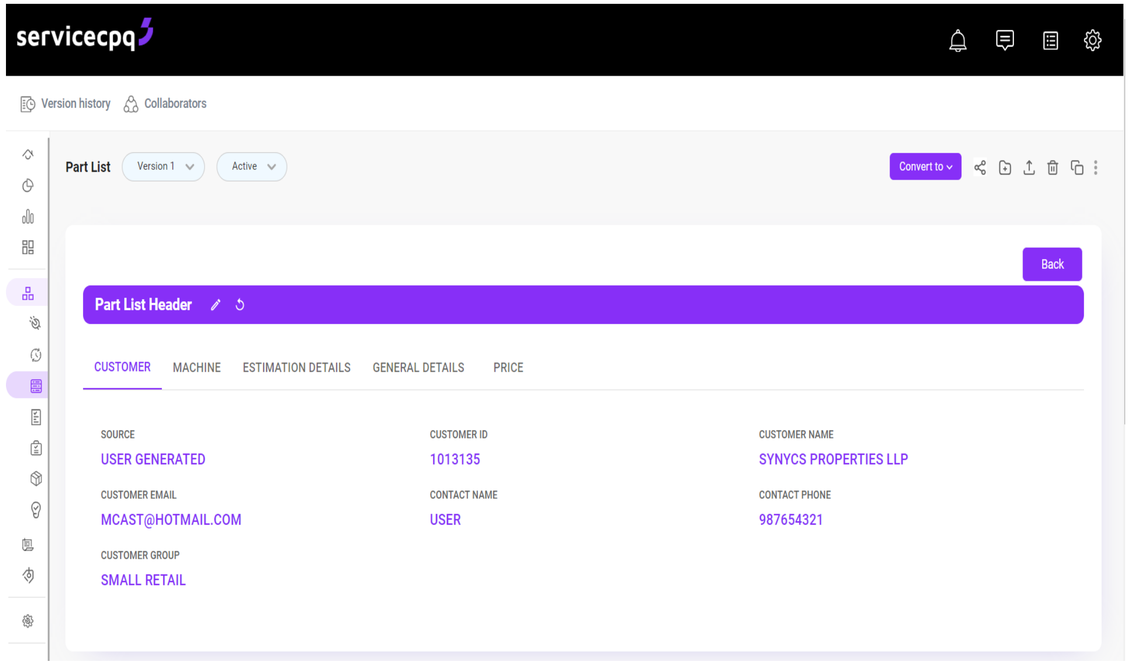
Servicecpq

Advanced Commercial Tools for Efficient Design, Configuration, Pricing, and Service Offerings.

GRANDES MENTES

Servicecpq helps machinery companies and service providers move towards a collaborative digital platform. This facilitates the creation of collective solutions among OEMs, service providers, customers, and partners. The AI-powered commercial platform enables you to uncover additional revenue streams within your service business that cannot be accessed through other software solutions.

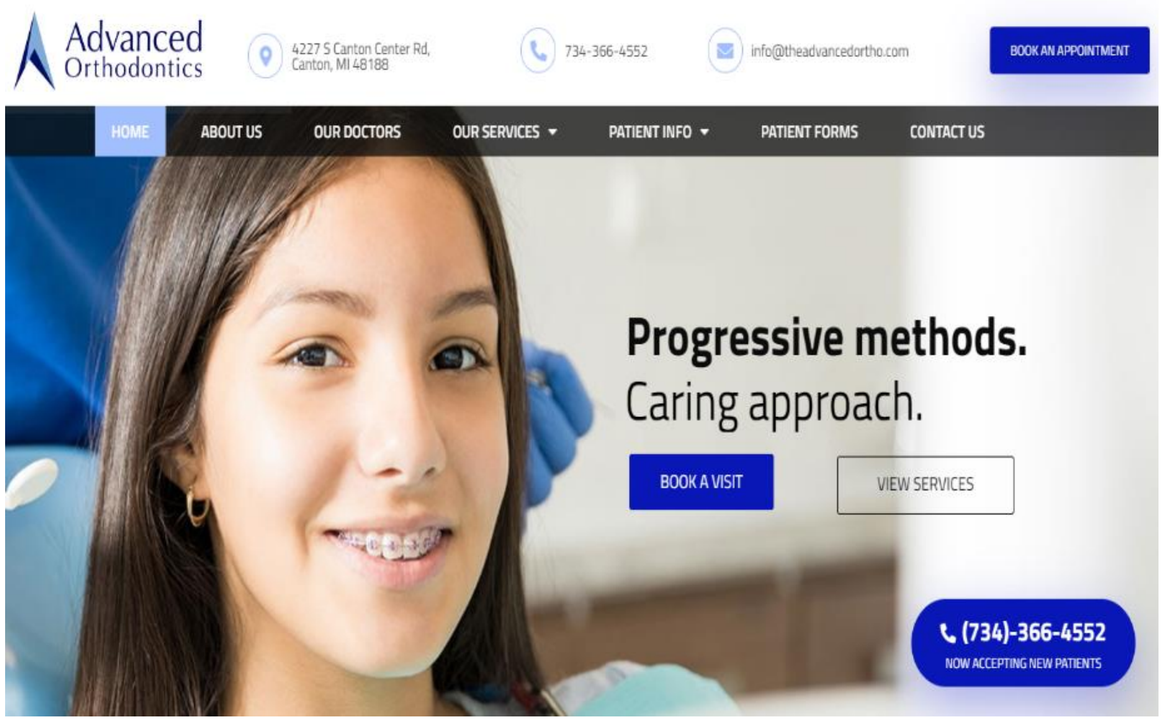




The Advanced Orthodontics, Canada

https://theadvancedortho.com/

Advanced Ortho creates customized treatment plans, best suiting each individual’s needs.

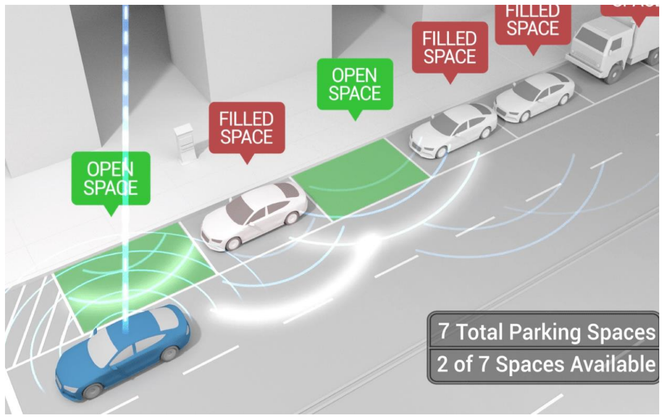


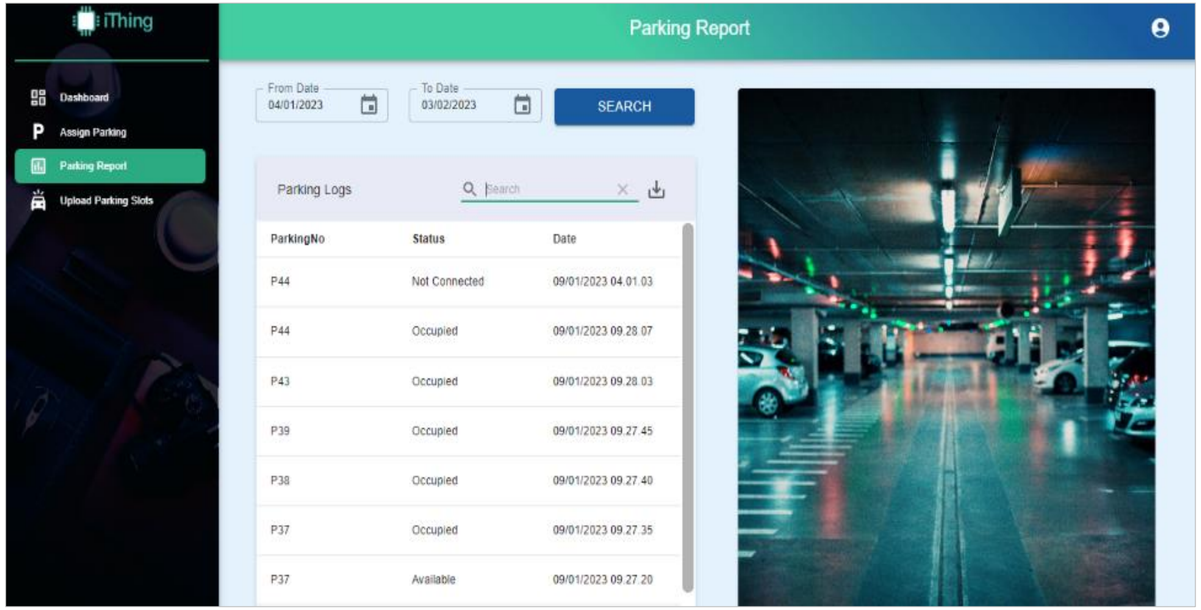
Parking Management system

It is challenging for companies and corporations to provide effective parking solutions to their customers. The parking management process could take lots of time and you need an application that would give you peace of mind as well as save your valuable time.

Managing parking is a critical activity at the places like colleges, offices, shopping malls, hospitals, etc. Grandes Mentes has introduced a solution powered by RFID to address every sort of parking problem.

Parking Management Solutions are **for Corporate Parking, Stadium, Shopping Malls & Public Parking Spaces**



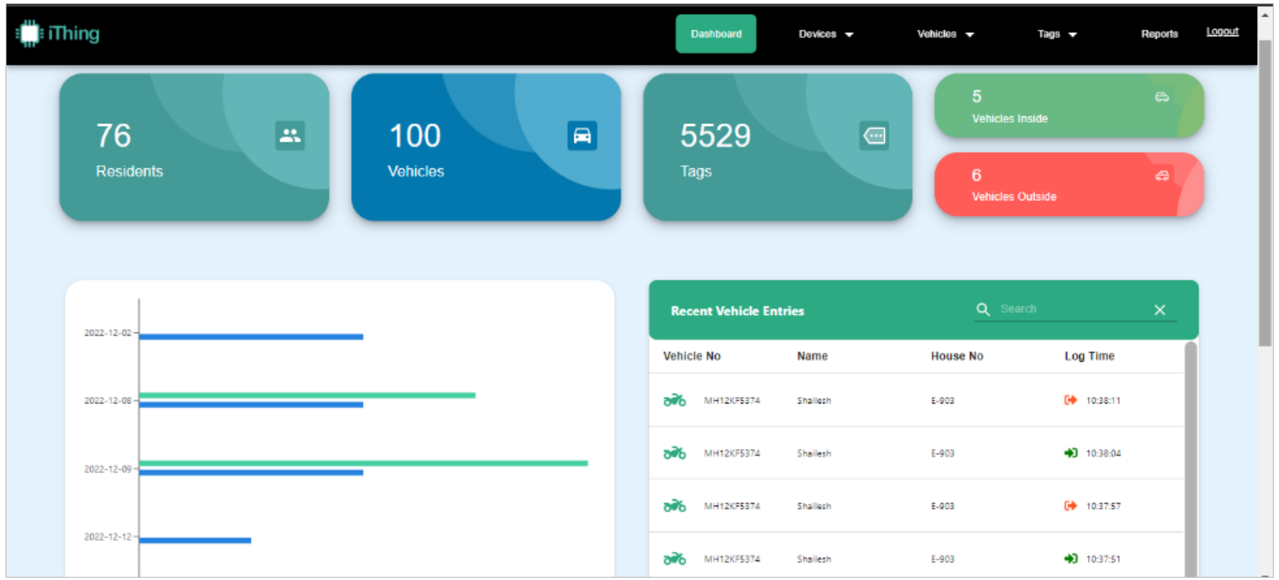


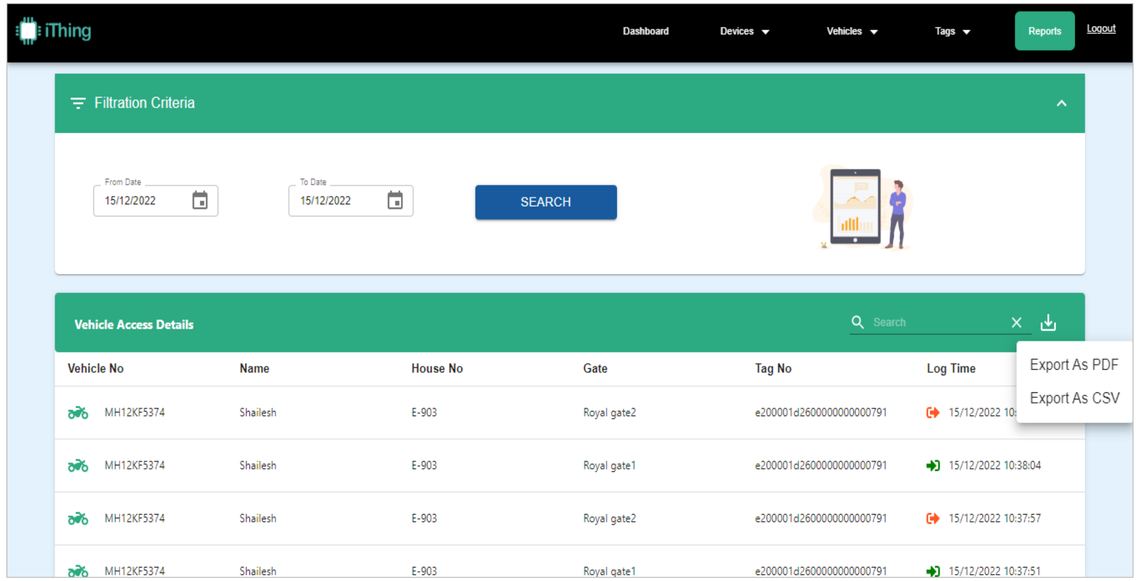
Vehicle access system with RFID

Managing vehicle is a tedious task. It is hard to track vehicle movements and for this, companies need manpower to control and manage effectively. By switching to RFID solutions, companies can effectively manage vehicles and control them without the intervention of huge manpower.

RFID readers will read the vehicle information and store it in the database. During the report generation, companies can get their desired reports. Besides, in real-time, it is very easy to control vehicle movement (entry/exit) with RFID solutions.

The application is the best fit for **Corporate Parks, RWA, Academic Institutions, Hospitality Industry**





PPL Translogistics App

PPL a leading logistics company of Maharashtra in the field of **commercial transportation, warehousing, logistics & distribution with customized 3PL services.**
